

Quote Quest

Marie Curie - Nothing in Life is to Be Feared

Marie Curie (1867-1934) was the first woman to win a Nobel Prize, the first person and the only woman to win the Nobel Prize twice, and the only person to win the Nobel Prize in two scientific fields. Curie coined the term “radioactivity” and discovered the elements polonium and radium. Under her direction, the world's first studies were conducted into the treatment of neoplasms using radioactive isotopes.

“Nothing in life is to be feared;
it is only to be _____ .
Now is the time to _____
more, so that we may fear less”

MARIE CURIE

Questions

1. What words are missing from the quote?
